

Bari Basic - Web Programming - Boot Camp

companion for the textbook available @
tutorials.baribasic.com/webtutorials

My Plan is to completely assault the viewer with lots of colors and odd font collections in this PowerPoint.

Also using comic sans right there to upset folks who don't like comic sans

Chapter One

Hello There

- This textbook is for complete beginners who know nothing about web app development or programming or HTML or CSS or JavaScript or Bootstrap.
- I have put together a simple web app. I want to teach you how to build that in the shortest possible time.

This is where your
journey begins.

Chapter One

Hello There

- The demo web app is available here
- baribasic.com/demowebappfortutorial

The best thing for any student to do is to just go ahead and just click demo web app link, look at the code and just practice using it. Forget about this entire tutorial and all this video nonsense
